

Project, Bonus
CS 4347
Fall 2023
Due: December 8th , 11:59 pm
Bonus Demonstrations:
Starting December 5th , 2023.
Bonus Material to be submitted by:
December 8th , 2023

Time for the Bonus

The classes after Fall Break has time scheduled for presentations. At the beginning of each class, Dr. Becker will ask if anyone would like to demo. The cohort would present their system to the class, and this application needs to have a wow factor. A simple dialog system of black, grey, and white will not do. There should be sound, pictures, movies, charts, graphs, animations. The class then will ask the cohort questions.

To get full points,

- the system must not crash,
- and the class has to be *engaged*.
- The program must be demonstrated.
- **NOTICE: THE DATABASE MUST BE CORRECTLY POPULATED.**
- Bonus will not be awarded to a cohort that did not complete the rest of assignment 4.

The bonus is worth +5 on the semester average.

NOTICE: If a subset of a cohort, either as a single individual or a subgroup wants to do the bonus, and the rest of the cohort does not, this is fine. The points will only be awarded to the cohort members who actually present and face the challenge of their peers.

Turn-In:

The bonus material will change from situation to situation. A separate turn-in on blackboard has been created. The bonus is due by the last day of class.
